## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of claims 16-19, 32 and 33 (Group IV) in the reply filed on 4/27/2005 is acknowledged. Because applicant did not distinctly and specifically point out any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-4, 6-9, 11, 12, 14, 15, 20-29, 31 and 34 (Groups I, II and III) are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant is requested to include cancellation of nonelected claims or other appropriate action in the following communication with the Office (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16-18 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2000-027270 A ('270).

JP ('270) shows a privacy enclosure [7] (figures 1 and 2), wherein the limitation "enclosure" is broadly interpreted to mean a substantially enveloped -- or confined -- space, but not necessarily a space that is surrounded on all sides

Art Unit: 3617

The vertical walls of a base [15] and a rigid outer wall structure [12] together provide an envelope to define an interior of a stowable enclosure when the rigid outer wall structure is in an expanded – or a vertical – configuration, as seen in figure 1. It is noted that the stowable enclosure constitutes only a portion of the privacy enclosure when the rigid outer wall structure is in an expanded configuration. Re the limitation “**stowable enclosure coupled to the lower base**”, because the stowable space is confined – or enveloped – by the horizontal floor portion of the base [15], such is considered to be coupled to the lower base.

A storage compartment [13] is located adjacent the privacy enclosure (figure 5). A toilet [16] is moveable between the storage compartment and the privacy enclosure, the toilet being slideable in a vertical direction.

#### ***Allowable Subject Matter***

4. Claim 33 is allowed.
5. Claims 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

6. Applicant's arguments filed 12/16/2004 have been fully considered but they are not persuasive.

Applicant's Argument: Re the rejection of claims 16-18 based on JP 2000-027270 A ('270), applicant has argued that JP ('270) does not disclose a stowable enclosure coupled to a base. Rather, it discloses a cover connected to a moveable board 15. The cover 12 merely defines a single sidewall when positioned in an expanded position. The cover 12 does not

Art Unit: 3617

define an "enclosure,". Instead, the enclosure of JP ('270) is provided by what appears to be curtains (65) hanging from a ceiling (4), which are neither rigid nor coupled to a lower base.

Examiner's Answer: The argument that the rigid outer wall 12 of JP ('270) is a single wall and therefore does not define an "enclosure," -- which instead is provided by what appears to be curtains (65) -- is erroneous in its assumptions.

Applicant may first note that the limitation "**enclosure**" has been broadly interpreted to mean a space that is substantially enveloped or confined, but not necessarily surrounded on all sides. JP ('270) shows a base [15] having vertical walls [41, 42] (see figure 6) and a rigid outer wall structure [12] (see figure 1). The vertical walls of the base [15], together with the rigid outer wall structure [12], provide an envelope to define an interior of an enclosure when the rigid outer wall structure is in an expanded configuration of figure 1. Nowhere does the rejection states the enclosure being formed by the curtains. Further, regarding the limitation "**stowable enclosure coupled to the lower base**", because the stowable space is confined – or enveloped – by the horizontal floor portion [40] of the base [15], such is considered as being coupled to the lower base (figure 6).

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- JP 64-029240 shows a collapsible privacy enclosure with a toilet storage region located above the drainage basin [8], and anticipates at least claim 32.
- Other prior art references cited in the attached PTO Form 892 each shows a privacy enclosure.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
